Forest Management

Structure and growth of a small group selection forest of calabrian pine in Southern Italy: A hypothesis for continuous cover forestry based on traditional silviculture
O. Ciancio (Florence, Italy), F. Iovino (Cosenza, Italy), G. Menguzzato, A. Nicolaci (Reggio Calabria, Italy) and S. Nocentini (Florence, Italy) 229

Conversion of clearcut beech coppices into high forests with continuous cover: A case study in central Italy
O. Ciancio (Firenze, Italy), P. Corona, A. Lamonaca, L. Portoghesi (Viterbo, Italy) and D. Travaglini (Firenze, Italy) 235

Influence of individual reserve trees on nearby reproduction in two-aged Appalachian hardwood stands
G.W. Miller (Morgantown, WV, USA), J.N. Kochenderfer (Parsons, WV, USA) and D.B. Fekedulegn (Morgantown, WV, USA) 241

Silvicultural measures to increase the mechanical stability of pure secondary Norway spruce stands before conversion
M. Slodicak and J. Novak (Opocno, Czech Republic) 252

Height growth of planted conifer seedlings in relation to solar radiation and position in Scots pine shelterwood
M. Strand, M.O. Löfvenius, U. Bergsten (Umeå, Sweden), T. Lundmark (Vindeln, Sweden) and O. Rosvall (Sävar, Sweden) 258

Biometrics & Information Technology

Evaluating structural indices by reversing forest structural analysis
A. Pommerening (Bangor, United Kingdom) 266

Inventory and modelling for forests in transition from even-aged to uneven-aged management
H. Sterba and T. Ledermann (Vienna, Austria) 278

Economics & Politics

A comparison of harvesting productivity and costs in thinning operations with and without midfield
P.S. Mederski (Poznań, Poland) 286

Creaming the best, or creatively transforming? Might felling the biggest trees first be a win–win strategy?
M. Price and C. Price (Bangor, United Kingdom) 297

Ecosystems & Biodiveristy

Water and element fluxes during the regeneration of Norway spruce with European beech: Effects of shelterwood-cut and clear-cut
W. Weis, V. Rotter and A. Göttlein (Freising, Germany) 304

Contents of *Forest Ecology and Management,* Volume 224 318
